<b>Total File Count= 679</b>		
	Software models available as of 6/01 are listed above. The facility and processing models identified below are scheduled for completion prior to start of the CAPPs contract and will be available to the CAPPs contractor in DELMIA format.	
	KSC Facility models for SSPF, O&C, VPF, PHSF, MPPF, SAEF II, OPF 1, OPF 2, PCR A, PCR B, and Landing Strip & Tow way.	
	CCAS Facility models for Hanger AE, SPIF, DPF, SLC 17A, SLC 17B, SLC 36, SLC 37, and SLC 40	
	VAFB Facility models for Building 2520, Building 1610, SLC2, SLC3, and SLC 4.	
	Also an Astrotech Facility model and a Dryden Tow way facility model.	
	Processing models for processing an MPLM in the SSPF, PCR, OPF, DFRC, Post Landing operations, and shipping container placement.	
	Processing models for IEA Rotation Stand Move.	
	Processing models for LIPS Move in SSPF.	
	Processing models for ICM access in VPF.	
	Processing models for UF-1 Launch on Need at Pad and in SSPF.	
	Processing models for Payload Late Access Platform and Payload Late Access Kit.	
	Processing models for Canister Trunnion Planarity Study for US Lab.	
	Processing models for TDRS Processing SAEF-II.	
	Processing models for GALEX/Pegasus Processing in MPPF and PHSF.	
	Processing models for MACE in VPF, PHSF, and MPPF.	
	Processing models for 11. GALEX/Pegasus Processing SAEF-II and VPF.	
	Processing models for 12. Non Toxic OMS Pod Study.	
	Processing models for dome Heat Shield Installation FMEA	
	Processing models for 14. SLC-2 White Room Operations for Delta-II.	
	End of contracted models list.
